

Monitoring and Troubleshooting Availability Groups

Russ Thomas

DATA ARCHITECT

@sqljudo

Our pristine demo environment ran exactly as designed.

The real world isn't often that perfect.

Monitoring and Troubleshooting

**Installation and
Configuration Errors**

**Performance and
Latency**

Team Effort

Monitoring and Troubleshooting

**Installation and
Configuration Errors**

**Performance and
Latency**

**Miscellaneous Issues
and Errors**

Monitoring and Alerting

SQL Server knows a lot about it's own health

We'll take a quick look at
new features specific to
SQL Server 2019

Two Major Obstacles to Cluster Setup

Firewalls

Rights

Common Cluster Issues Related to Rights

There are a number of ports required (see clustering module)

Sysadmin required on every node being configured

Failover cluster needs full control over all cluster objects

Two Major Obstacles to AG Setup

Firewalls

Rights

Two Major Obstacles to AG Setup

SQL Error 1418

SQL Error 35250

Troubleshooting Ports and Firewalls

Make absolutely sure the port number is correct

Check firewall logs

Test with netstat / telnet or other firewall testing approach

Maintain a good
relationship with
your infosec team

Endpoint Permission Options

Shared domain accounts

Different domain accounts (ensure GRANT CONNECT)

Certificates

SQL Server Service Account

Troubleshooting connectivity
<https://bit.ly/2OWgX0L>

AG permissions
<https://bit.ly/2OWuISF>

SQL Server Performance

SQL Server Performance

Waits

Queues

Availability Group Latency

Time to Commit on Primary

Time to Read on Secondary

SQL Server Performance

Waits

HADR_SYNC_COMMIT

Queues

AG Replication Queues

Viewing Wait Stats in SQL Server

```
exec sp_whoisactive  -- popular community tool
```

```
select * from sys.dm_os_wait_stats  -- SQL DMV
```

Important SQL Server Team Blogs

SQL Server CSS Team: <https://blogs.msdn.microsoft.com/psssql/>

SQL Server Team: https://blogs.msdn.microsoft.com/sql_server_team

Always On Team: <https://blogs.msdn.microsoft.com/sqlalwayson>

SQL Server Extended Events

Event based

You can capture events of interest

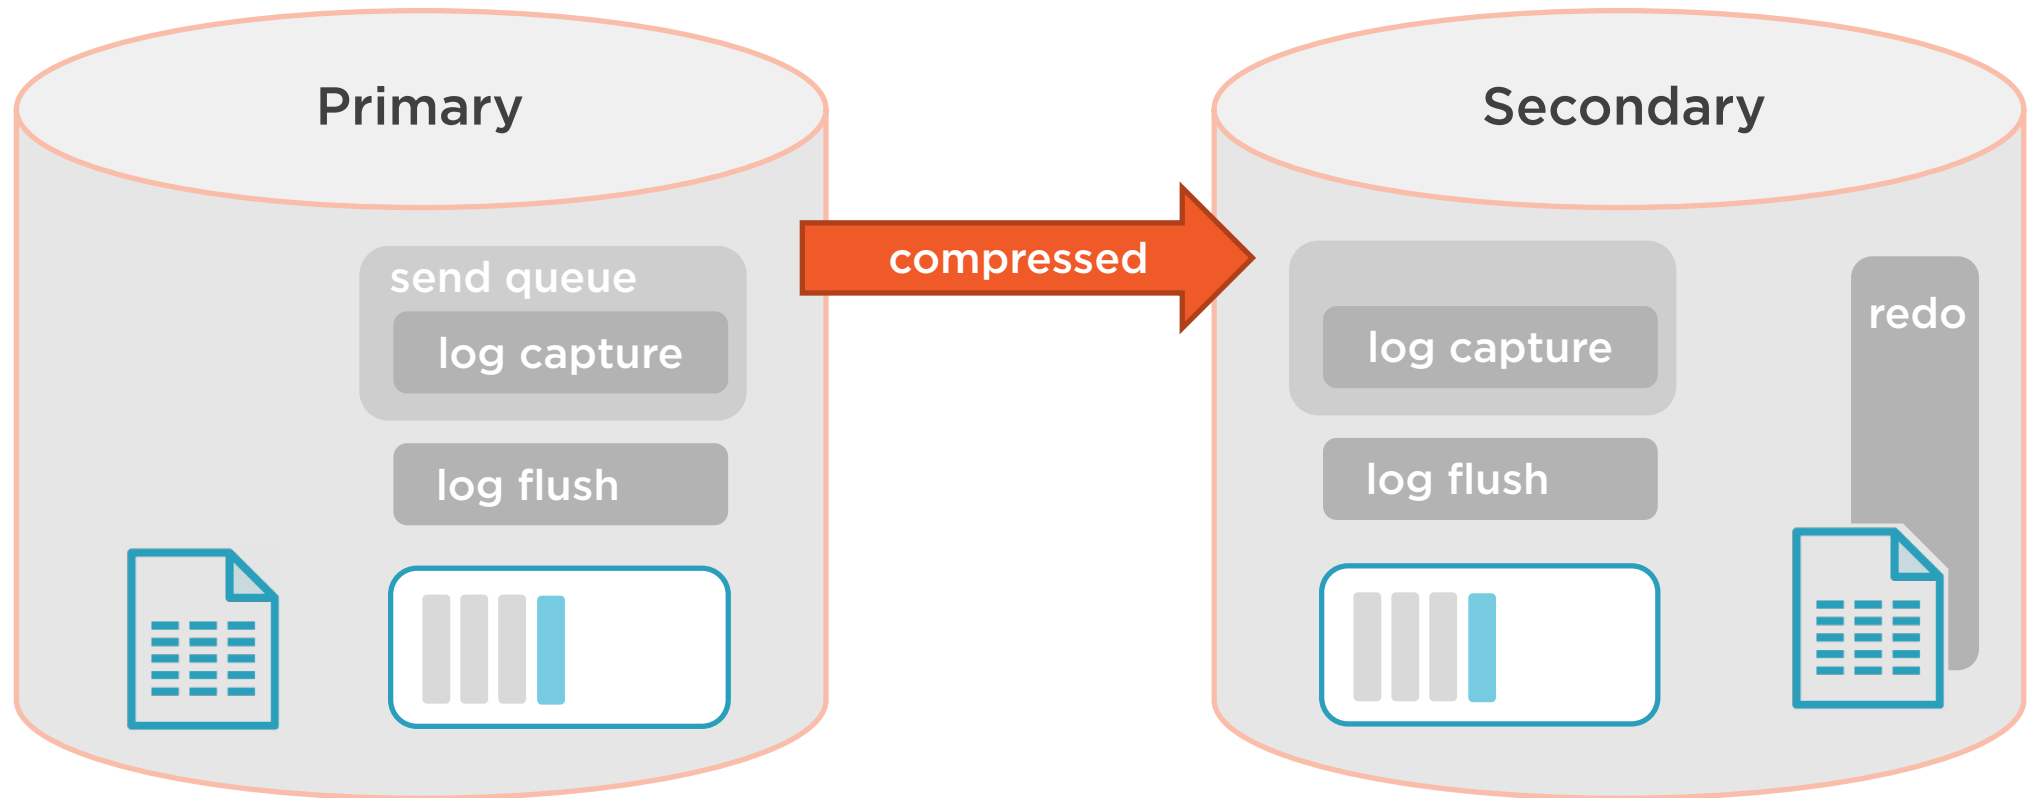

Event messages contain meta-data about the event that occurred

Data Synchronization

Data Synchronization

Log Block Compression

Asynchronous

Compressed by default

Synchronous

Not compressed by default

Replica Object Drift

Dependent Object Synchronization in AG

Automatically Synched

Database Level Objects

Tables

Views

Stored Procs

User Defined Functions

Database Users

Items Not Synched

Instance Level Objects

Logins

Linked Servers

Agent Jobs

Certificates and Keys

SSIS Catalogs

- Drift prevention
 - Disciplined change controls
 - Explicit ID of DB level objects
 - Explicit ID of instance level objects
- Supplement with additional approaches
 - Regular object audits
 - PowerShell or TSQL scripts

Exercise Your Replicas

Exercise Your Replicas

Failover

Exercise Your Replicas

Failover

Monitoring and Alerting

Extended Events

Policy Based Management

SQL Server Extended Events

Event based

You can capture events of interest

Event messages contain meta-data about the event that occurred

Baselines are critical to
monitoring and troubleshooting

Extended Events

Events are lightweight but not free

Use very focused sessions that are only enabled when needed

<https://bit.ly/2z9pDH1>

Policy Based Management

Active Monitoring

**Structured Policy
Definition**

**Configurable Actions
for Violations**

Policy Based Management Training

Microsoft Documentation

2019 feature information as of SQL PASS 2018

2019 Features for Availability Groups

Support for AG on containers with kubernetes for orchestration

Linux support for MS DTC

Secondary-to-primary replica connection redirection

Secondary-to-primary Connection Redirection

Read scaling and DR option for when cluster type = NONE

Allow seamless failovers in environments without a listener

Configured much like read-routing is today

2019 Synchronous Replicas

2017 Synchronous Replicas

2019 Synchronous Replicas

System DB support for
replication of instance level
objects!

Thank You
